

## Cyprus 03/2016

A very small 2 days long trip, in Cyprus to try to see bats. We visited two places, mines in Akamas peninsula and a mine in Kalavasos. We didn't have the time to visit mines in Troodos but it looks a very good place.

It was late in the hibernate's season and we missed several species.

**1 - Lesser horseshoe bat (*Rhinolophus hipposideros*)** : Several in each places

**2 - Greater horseshoe bat (*Rhinolophus ferrumequinum*)** : one in each places

**3 - Kolombatovic's long-eared bat (*Plecotus kolombatovici*)** : 1 in Akamas peninsula

We miss...

**Common bent-wing bat (*Miniopterus schreibersii*)** : Common in Troodos mines.

**Savi's pipistrelle (*Hypsugo savii*)** : Common in Troodos mines.

**Egyptian fruit bat (*Rousettus aegyptiacus*)** : Usually common in Akamas peninsula but it is too late in the season.

**Blasius's horseshoe bat (*Rhinolophus blasii*)** : Usually one or two in Kalavasos but we don't see.
